**All Persons Consuming Water from the  
Manitowadge Drinking Water System**

**Drinking Water Advisory Notice**

Please be advised that recent water samples have shown sodium levels to exceed 20 mg/l. This is a concern for people who are on a sodium restricted diet.

Please ensure that an alternative source of drinking water such as bottled water is available for those who are required to limit their sodium intake.

This advisory will remain in effect until test results indicate that sodium concentration levels fall below 20 mg/l.

If you have any questions, please call our office at 625-5926/625-5930 and after hours please call Nurses Registry at 624-1280.

Yours truly,

Ken Adams, C.P.H.I. (C)
